

FIVE STEPS TO STRONGER CYBERSECURITY FOR REMOTE EMPLOYEES

01. ENFORCE EMAIL SECURITY

- » Remind employees to use caution opening emails from people they don't know.
 - » Train employees to spot red flags and report suspicious emails.
-

02. IMPROVE WI-FI SECURITY

- » Remind employees to keep Wi-Fi software up to date.
 - » Encourage employees to use strong passwords.
-

03. ACTIVATE WIRELESS NETWORK ENCRYPTION

- » Remind employees to encrypt home wireless networks.
-

04. SET DEVICE STANDARDS

- » Use company-issued devices, as able.
 - » Set minimum standards for personal devices used to access employer networks remotely.
-

05. PROVIDE CLEAR POLICIES AND TRAINING

- » Codify and clearly communicate remote work and cybersecurity policies and expectations
- » Train employees on your policies and expectations.
